

One Team. *One Mission.* Exceptional Cardiac Care.

Exceptional cardiac surgery requires more than a single procedure. It depends on a coordinated team supporting every step of care.

At St. Elizabeth Healthcare, that team works as one, ensuring safety, communication and continuity from admission through discharge.

St. Elizabeth
HEALTHCARE

The Office Team

Your First Point of Contact

- Guides patients through appointments, testing and preoperative preparation.
- Ensures peace of mind with clear communication and a smooth transition into surgical planning.
- Gives ongoing support for questions and postoperative needs.

Precision and Coordination

- Includes physician assistants, surgical assistants, anesthesiologists, perfusionists and circulating nurses.
- Specializes in complex mitral, aortic and tricuspid surgery, including minimally invasive and endoscopic approaches.
- Functions as an integrated unit focused on accuracy, safety and optimal outcomes.

The Operating Room Team

The ICU Team

Comprehensive Recovery Support

- Provides continuous postoperative monitoring in a specialized cardiovascular ICU.
- Multidisciplinary care including nursing, intensivists, respiratory therapy, physical therapy and more.
- Designed to support early mobility, to lower complications and to streamline the transition to home.
